111 Laurel St. Zandrovilla Nagpayong Pinagbuhatan Pasig City

EDUCATION

Eulogio “Amang” Rodriguez Institute of Science and Technology <i>Bachelor of Science in Computer Science</i> • Concentrations: Intelligence and Modeling/Simulations • Related Coursework: Data Structures & Algorithms, Computer Organization & Programming, Machine Learning, Artificial Intelligence, Object-Oriented Programming	Sampaloc, Manila <i>Expected Graduation, August 2025</i>
--	--

EXPERIENCE

Freelance System Developer <i>Arduino Coding Assistant</i> • Developed and optimized the code for an <i>Automatic Watering System</i>, utilizing Arduino to automate irrigation based on real-time soil moisture sensor data. • Implemented the functionality for a <i>Smart Trash Bin</i> system that used sensors to detect and automatically segregate biodegradable and non-biodegradable waste, enhancing waste management efficiency.	Pinagbuhatan, Pasig <i>July 2023 – May 2024</i>
Internship <i>Web Developer</i> • Developed dynamic forms and CRUD interfaces for managing resident profiles, household records, and barangay staff using React and TypeScript. • Integrated backend APIs to handle document requests, ID generation, and permit issuance with real-time status tracking. • Implemented data visualization features for financial reports, health incidents, and peace & order statistics using chart libraries and analytics dashboards.	Ortigas Center, Pasig <i>March 2025 – June 2025</i>

PROJECTS

CommunityConnect – Barangay Database System <i>Group Leader</i> • Implemented user authentication, resident records management, and barangay officials tracking, providing a comprehensive tool for managing barangay data and population statistics. • Developed system features such as total population tracking, household record management, and an admin panel for managing users and data modifications.	Sta. Mesa, Manila <i>Jan 2024 – July 2024</i>
Study Compass – Recommendation System <i>Thesis Leader</i> • Trained mathematical models to classify study pattern level of the student using Logistic Regression, Random Forest, Decision Trees, K-Nearest Neighbor and Support Vector Machine algorithms. • Scripted the study pattern level classifier model and obtained a classification accuracy of 95.5% • Developed a recommendation system based on the model’s analysis. The system features a user-friendly interface with tabs for login, study analysis, personalized recommendations, and progress tracking, allowing users to create more effective and organized study routines.	Nagtahan, Manila <i>Sep 2024 – Feb 2025</i>

ACTIVITIES AND LEADERSHIP

Balikatan Bible Baptist Church <i>Music Leader</i> • Led a choir of 15+ members, providing guidance in song practice and performance for Sunday services	Pinagbuhatan, Pasig <i>April 2022 – Current</i>
FreeCodeCamp <i>Organization Member</i> • Completed five programming courses on FreeCodeCamp to enhance my coding skills and broaden my knowledge of software development.	freeCodeCamp.org <i>Oct 2022 – Sep 2024</i>

SKILLS

Programming: Python, JavaScript, JQuery SQL, Node.js, React.js, React Native, Flask, PHP Laravel, Typescript, C, C++ Technical/Programmatic: Data Structures and Algorithms, Machine Learning, Data Mining, Database Management Platforms: Linux, Windows Honors: Dean’s Lister Languages: English, Tagalog Interests: Basketball, Computer Games, Music
