Pinagbuhatan, Pasig City

EDUCATION

Eulogio “Amang” Rodriguez Institute of Science and Technology <i>Bachelor of Science in Computer Science</i>	Sampaloc, Manila <i>Aug 2021 – Aug 2025</i>
Cum Laude Concentrations: Intelligence and Modeling/Simulations Related Coursework: Data Structures & Algorithms, Computer Organization & Programming, Machine Learning, Artificial Intelligence, Object-Oriented Programming	

EXPERIENCE

Freelance System Developer <i>Arduino Coding Assistant</i>	Pinagbuhatan, Pasig <i>Jul 2023 – May 2024</i>
- Developed and optimized the code for an <i>Automatic Watering System</i>, utilizing Arduino to automate irrigation based on real-time soil moisture sensor data. - Implemented the functionality for a <i>Smart Trash Bin</i> system that used sensors to detect and automatically segregate biodegradable and non-biodegradable waste, enhancing waste management efficiency.	
Wizzard Technologies, Inc. <i>Web Developer Intern</i>	Ortigas Center, Pasig <i>Mar 2025 – Jun 2025</i>
- Developed dynamic forms and CRUD interfaces for managing resident profiles, household records, and barangay staff using React and TypeScript. - Integrated backend APIs to handle document requests, ID generation, and permit issuance with real-time status tracking. - Implemented data visualization features for financial reports, health incidents, and peace & order statistics using chart libraries and analytics dashboards.	
Progressive Medical Corporation <i>Backend Web Developer</i>	Ortigas Center, Pasig <i>Aug 2025 – Sep 2026</i>
- Developed and maintain TrackWise, a Laravel/React/Inertia.js hospital invoice management system with an analytics dashboard, automated aging tracker, and invoice history log to improve billing transparency and collections. - Contributed to the development of New Employee Orientation, a multi-company onboarding platform with role-based content targeting and a legally-binding acknowledgment flow (e-signature, live photo, audit trail), streamlining HR compliance. - Maintain and develop e-commerce websites for 3 companies on OpenCart, leading the ongoing migration from OpenCart to Shopify; provide ongoing website maintenance, performance optimization, and technical support across the organization.	

PROJECTS

CommunityConnect – Barangay Database System <i>Group Leader</i>	<i>Jan 2024 – Jul 2024</i>
- Implemented user authentication, resident records management, and barangay officials tracking, providing a comprehensive tool for managing barangay data and population statistics. - Developed system features such as total population tracking, household record management, and an admin panel for managing users and data modifications.	
Study Compass – Recommendation System <i>Thesis Leader</i>	<i>Sep 2024 – Feb 2025</i>
- Trained mathematical models to classify study pattern level of the student using Logistic Regression, Random Forest, Decision Trees, K-Nearest Neighbor and Support Vector Machine algorithms. - Scripted the study pattern level classifier model and obtained a classification accuracy of 95.5% - Developed a recommendation system based on the model’s analysis. The system features a user-friendly interface with tabs for login, study analysis, personalized recommendations, and progress tracking, allowing users to create more effective and organized study routines.	

TrackWise – Invoice Tracking and Management System

Full-Stack Developer

Nov 2025 – Feb 2026

- Architected a full-stack invoice management system using Laravel 12 (REST API), React 19 via Inertia.js (SSR-free SPA), and MySQL, deployed and actively used in production by a medical supply company.
- Implemented role-based access control with 13 granular permissions using Laravel policies and middleware, enabling admin-configurable, position-based access per employee.
- Built bulk data import/export using maatwebsite/excel for Excel parsing and barryvdh/laravel-dompdf for PDF invoice generation, plus a Recharts-powered analytics dashboard (invoice aging, outstanding balances, volume trends).

Style Match – AI-powered Hairstyle Recommendation Application

Full-Stack Developer

Dec 2025 – Jan 2026

- Built a full-stack mobile application (React Native/Expo frontend, Flask REST API backend) integrating a custom-trained YOLO11 object detection model for multi-class facial trait classification (30 classes spanning gender, face shape, and skin tone).
- Integrated InsightFace and ONNX Runtime to implement a face-swapping pipeline, rendering recommended hairstyles onto the user's detected face for real-time visual preview.

ACTIVITIES

FreeCodeCamp

freeCodeCamp.org

Organization Member

Oct 2022 – Sep 2024

- Completed Back End Development and APIs — built RESTful APIs and full-stack applications using Node.js, Express, and MongoDB.
- Completed Relational Database — practiced database design, SQL querying, and data management using PostgreSQL.
- Completed Front End Development Libraries — built interactive UIs using React, Redux, and Bootstrap.
- Completed JavaScript Algorithms and Data Structures — strengthened core programming fundamentals, algorithmic problem-solving, and data structure implementation in JavaScript.
- Completed Responsive Web Design — developed responsive, accessible layouts using HTML5, CSS3, and Flexbox/Grid.

SKILLS

Programming: Python, JavaScript, PHP, Typescript

Tools: MySQL, XAMPP, React, React Native, Flask, Laravel, Tailwind CSS, Inertia.js

Technical/Programmatic: Data Structures and Algorithms, Machine Learning, Data Mining, Database Management

Platforms: Linux, Windows

Honors: Dean’s Lister, Cum Laude

Languages: English, Tagalog

Interests: Basketball, Computer Games, Music
